- High Frequency High Definition Sonar
- Built for Seining or Trawling
- Great in Shallow Water Fishing
- **Number One** Small Vessel Omni Sonar

This small sonar has a big feature set to help you

**Consistently Catch More Fish!!**

- \* Oil Filled Protective Shield for Long Life !!
- \* Available Short Stroke 0.45m (18") Hoist for Smaller Vessels !!
- \* Fits in all Wesmar, Furuno and Simrad sea-chests with a minimum i.d. of 180mm (7.2")
- \* 5 degree Vertical Beam width for the best shallow water and surface species detection
- \* Choice of short, medium and long pulse for better targeting control
- \* Reverberation Controlled Gain - distinguish targets from the bottom surface by controlling the gain of large signal patterns
- \* Search and Auto Target Tracking with Directional Beam Stabilization to help you find and lock on to your catch in all weather conditions
- \* Captain's chair joystick control with control setting on the screen for complete ease of use in the roughest conditions
- \* Peak detection to identify the most dense area of a target
- \* Detailed easy to use control features: Interference Rejector, Echo Decay, Noise Rejector, Beam Filter and others built to help you fine tune your sonar for your fishery
- \* Multi-Language Control Panel

**Free Feature Updates Via Software**
